

Highlighted Source Code

A short paragraph precedes the code so the render has body text on the page.

Ruby

```
def fibonacci(count)
  seq = [0, 1]
  (2...count).each { |i| seq << seq[i - 1] + seq[i - 2] }
  seq.first(count)
end

puts fibonacci(10).inspect
```

JavaScript

```
const fibonacci = (count) => {
  const seq = [0, 1];
  for (let i = 2; i < count; i += 1) {
    seq.push(seq[i - 1] + seq[i - 2]);
  }
  return seq.slice(0, count);
};

console.log(fibonacci(10));
```
