

Branded Field Guide

Ada Lovelace

A short introduction paragraph precedes the first section so the rendered page has body text in the themed base font, set against the warm page background this fixture's theme declares.

Typography

The section headings on this page are set in the branded monospace family the custom theme registers, in the brand accent colour, while body copy stays in the inherited serif base font. This section exists so the comparison exercises both the branded heading font and the base font on one page.

Regular paragraph text, with some **bold** and *italic* runs, so the base font's four styles all render.

Imagery

The embedded raster above is mounted from the project's own images directory, exactly as it would be for a real export. Rendering it here confirms local image resolution stays faithful to the reference.
